

POWDER PRODUCTS

Fine powders gently provide a mattifying appearance and fix make-up. Starches provide a (partial) alternative to talc and mica. Starches can

- absorb sebum
- enhance skin feel
- and improve the stability of pressed powders
- Deo-stick
- Pump spray

Corn starch has a similar particle size range to that of mica (2 – 25 μ m) whereas rice starches are even finer (approx. 8 μ m) and exhibit an extraordinary soft-touch. The large surface allows a fine distribution of both functional and active ingredients.
